

Bela Bartok: A Celebration

This compilation of essays, lectures, and scholarly papers from 1953 to the present includes insights obtained by the author over a half-century career as a Bartok specialist. Divided into three parts, chapters examine Bartok as a multifaceted music figure: composer, folklorist, pianist, and teacher. As composer, it includes program notes, an introduction to his principles of composition, and theoretic-analytical discussion of selected works, including Mikrokosmos. As folklorist, it examines the outcome of Bartok's fieldwork, methodology, and findings in East European, Arabic, and Turkish autochthonous folk music materials. Bartok's American years are also discussed. The narrative is supported by a substantial number of musical examples and references. Particularly essential for music teachers and university students, it is an indispensable resource for future research in Bartok studies. It is also intended for theorists, ethnomusicologists, and musicians interested in understanding Bartok's compositional processes and methodology.
