

Learning technologies in social care: A guide for employers

Learning technologies have much to offer social care employers. This introductory guide aims to help you make the most of them for workforce development. It does not assume any prior technical or e-learning knowledge. This guide is aimed at employers and managers in the care sector with responsibility for staff learning and development (L&D). This guide offers a (non-technical) overview of learning technologies, with guidance to help you assess what might be useful to you. Please note: This publication is free of charge. The fee to purchase this publication is set by the distributor and not by the publisher Skills for Care/Skills for Care & Development.
