

GIMPTIPS Book 2 Mirrored Text Effect

Mirrored Text is an effect that can be used for almost every application, whether it is for a letterhead, web page, or any other project you wish to incorporate a graphic image. In this brief and easy-to-follow-along exercise you will be visually guided step-by-step and learn how to: Begin the New Project - Set the Canvas Width and Height - Add Text - Align the Text to the Canvas - Duplicate the Original Text Layer - Manipulate the Duplicated Text Layer - Use the Blend Tool - Move Layers between the Stacked Layers - Merge the Active Layers down - Merge the Visible Layer down - Save the Project as a GIMP (.xcf) file - Save the Project as a PNG (.png) file. GIMPTIPS is a compilation of effects that can be used separately or in combination with other effects to create a unique GIMP project.
