

The Age of Chopin: Interdisciplinary Inquiries

This multidisciplinary collection addresses Chopin's life and oeuvre in various cultural contexts of his era. Fourteen original essays by internationally-known scholars suggest new connections between his compositions and the intellectual, literary, artistic, and musical environs of Warsaw and Paris. Individual essays consider representations of Chopin in the visual arts; reception in the United States and in Poland; analytical aspects of the mazurkas and waltzes; and political, literary, and gender aspects of Chopin's music and legacy. Several senior scholars represent the fields of American, Western European, and Polish history; Slavic literature; musicology; music theory; and art history.
